DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-8 and 33-40 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-8 and 33-40 are rejected under 35 U.S.C. 102(e) as being anticipated by Bendelac et al (Bendelac), U.S. Pub. No. 2005/0122997.

Regarding claims 1-8 and 33-40, Bendelac discloses a method/system for processing information received by a wireless device via a server over a computer network from a website (abstract) comprising receiving information at said server from said website over said computer network (0043 and 0044; figures 5 and 6), at said server, parsing at least some of said information and at said server, employing at least some results of said parsing to provide said information in a form suitable for display to a user on said wireless device by classifying said information according to its importance to a user (0053, 0054, 0057, 0058, 0081; figure 6).

Bendelac further discloses wherein different devices, such as Web telephones, cellular phones and PDA's, can be used in the system described (0097).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Summers et al, U.S. Pub. No. 2001/0032234, discloses mapping an Internet document to be accessed over a telephone system.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
